

Course Name:	Web Development Laboratory (316U01L306)	Semester:	III
Date of Performance:	17/ 08/ 2026	DIV/ Batch No:	B1
Student Name:	Arjun Santosh Jadhav	Roll No:	16010125079

Experiment No: 2

Title: Design web Portal using CSS3.

Aim of the Experiment: To apply CSS3 style sheets to an existing HTML5-based Web Portal for the given Use Case study in order to enhance layout, responsiveness, visual aesthetics, and user interaction using modern CSS3 features.

Objectives for the Experiment:

1. Implement different CSS3 styling techniques
2. Design responsive layouts using Flexbox and media queries
3. Enhance user interaction using animations
4. Maintain separation of content and presentation

COs to be achieved:

CO1: Use CSS to prepare the layout of web pages.

Books/ Journals/ Websites references:

1. <https://www.geeksforgeeks.org/css/css-tutorial/>
2. <https://claude.ai/new> (for debugging)

Theory:

Students should write about CSS3 (citation needed for content taken (IEEE or APA7 style))

Problem statement: Demonstrate the implementation of CSS3 features to enhance the layout, responsiveness, and aesthetics of the selected HTML-based web portal for the selected Use Case in experiment 1.

Note: All tasks are compulsory to use.

Task 1: Style the Homepage Header (Inline CSS)

Requirements:

- Use **inline CSS** to:
 - Set background color for header
 - Change text color of store name
 - Center align slogan
 - Add padding and border
- Apply inline style to:
 - `<h1>`, `<p>`, `<header>`

Concepts tested:

Inline CSS, color, background, padding, text-align, border.

Task 2: Internal CSS for Navigation Menu

Navigation menu should look professional and consistent across the page.

Requirements:

- Use **internal CSS** (`<style>` in `<head>`)
- Style navigation menu:
 - Remove bullet points
 - Display menu items horizontally
 - Add hover effect
 - Change link colors
- Use:
 - `:hover`, `text-decoration`, `display: inline-block`

Concepts tested:

Internal CSS, selectors, pseudo-class, styling links.

Task 3: External CSS for Whole Website Theme

For a consistent look across all pages.

Requirements:

- Create file: `style.css`
- Link it using `<link>`
- Apply:

- Body font-family
- Background color
- Common heading color
- Common footer style

Concepts tested:

External CSS, reusable styles, site-wide theming.

Deliverables : style.css linked with book.html

Task 4: Style Book Categories Sidebar

The categories section should look like a card.

Requirements:

- Use **external or internal CSS**
- Apply:
 - Border
 - Box shadow
 - Padding
 - Rounded corners
- Style list items with:
 - Spacing
 - Hover color change

Concepts tested:

Box model, border-radius, box-shadow, list styling.

Task 5: Book Card Layout Using CSS Box Model

To make Each item appear as a product card.

Requirements:

- Style a `<div>` as a book card:
 - Width, margin, padding, border
 - Center align content
- Use:
 - `display: inline-block`
 - Add background color and shadow

Concepts tested:

Box model, margin, padding, display property.

Deliverable : link this .css file with book.html

Task 6: Image Gallery Styling with CSS

To make Featured appropriate items/ attributes, whichever applicable in the Use Case look like a grid.

Requirements:

- Use **CSS** to:
 - Set same size for all images
 - Add border and hover zoom effect
 - Add spacing between images
- Use:
 - transition, transform: scale()

Concepts tested:

Image styling, hover effects, transitions.

Deliverable nav.css , link to nav bar of expt1

Task 7: Table Styling for Price List**Requirements:**

- Use **CSS** to:
 - Collapse borders
 - Add header background color
 - Zebra-stripping rows
 - Center align text
- Use:
 - border-collapse, nth-child(even)

Concepts tested:

Table styling, pseudo-classes.

Deliverable table.css , link to the corresponding file.

Task 8: Style Registration Form**Requirements:**

- Style:
 - Input boxes width, padding
 - Submit button color and hover effect
 - Fieldset and legend
- Use:
 - :focus, :hover
 - border-radius

Concepts tested:

Form UI styling, pseudo-classes, layout.

Deliverable : form.css

Task 9: Page Layout Using CSS (Header, Sidebar, Content, Footer)

To Create a proper website layout.

Requirements:

- Use CSS to:
 - Set sidebar to left
 - Content to right
 - Footer at bottom
- Use:
 - float or flex
 - Set widths and spacing

Concepts tested:

Layout design, positioning, float/flex.

Deliverable : layout.css

Task 10: CSS Effects & Highlighting.

To attract attention for Special events/data/section, etc..

Requirements:

- Create an “Offer” box:
 - Blinking or glowing effect
 - Different background color
 - Bigger font

- Use:
 - @keyframes animation OR hover effect
 - text-shadow, box-shadow

Concepts tested:

CSS animations, effects, visual emphasis.

Code:

Task 3:-

Welcome to Arjun Path Labs

Accurate Diagnostics for Better Healthcare

[Home page](#) [Laboratory test](#) [Health Packages](#) [Online Registration](#) [Reports](#) [Contact Us](#)

About Our Laboratory

Arjun Path Labs is a multi-specialty diagnostic center offering accurate and timely laboratory testing services, including our AI-enabled Urine Test Strip Reader System for fast, reliable results.

ARJUN PATH LABS

MODERN DIAGNOSTIC SERVICES
QUALITY, ACCURACY & TRUST

Health Tip of the Day

Regular health check-ups help detect conditions early. Get your annual blood and urine test done to stay ahead of potential health risks.

Lab Timings

Monday - Saturday: 7:00 AM - 8:00 PM
Sunday: 8:00 AM - 2:00 PM

Post Lab Subjective/Objective type Questions:

1. Use Bootstrap for CSS.

Bootstrap is a CSS framework that provides pre-built utility classes for common styling needs (spacing, colors, buttons, alerts, layout grids), which can be applied directly via class attributes instead of writing custom CSS. I linked Bootstrap via its CDN and converted my 'Offer' box to use Bootstrap's **alert** and utility classes as a demonstration. While Bootstrap speeds up development significantly, writing custom CSS (as I did for the rest of this experiment) gives finer control over exact visual design and avoids the 'generic Bootstrap look' many sites share.

Conclusion and Discussion:

Doing this experiment really showed me how much CSS3 can transform a plain HTML page. I went from basic inline styles to a full external stylesheet, picking up the box model, selectors, hover effects, Flexbox, and even a bit of animation along the way. Watching my healthcare portal go from looking bare to actually feeling like a real, polished website was honestly pretty satisfying.

Feedback:-

It looks great!

Index page is a little saturated.

The font style is good.
